

**Preliminary Agenda (all times in EDT)**

**Thursday, June 10, 2021**

- |                            |                  |   |
|----------------------------|------------------|---|
| <b>11:00 am – 12:00 pm</b> | <b>Session 1</b> | <p><b>A/E/C Industry Overview</b><br/>                 What is the current state of the industry? Hear the results of EFCG’s industry summary with results from the CEOs of some of the AEC industry’s largest players as well as EFCG’s own observations, supplemented by some highlights from the Technology Leadership Survey.</p>   |
| <b>1:00 pm – 2:00 pm</b>   | <b>Session 2</b> | <p><b>The Business of Innovation and Technology</b><br/>                 How do you include room for innovation in a time of tremendous pressure? How do you move both your business and your customers through the adoption curve quickly?</p>   |
| <b>3:00 pm – 4:00 pm</b>   | <b>Session 3</b> | <p><b>Post-COVID Ways of Working</b><br/>                 The view still isn’t clear on whether employees will be ‘strongly encouraged’ to return to the office or whether largely working from home will be the new norm. However, one thing is certain – people have adapted to having technology-mediated relationships and we have proven that we can still do business without face-to-face interactions. This session will explore what work might look like in a post-COVID world, including how we take best advantage of MS Teams, practical tips on engaging with clients to replicate the ‘embedded consultant’ feel, etc.</p> |
| <b>4:15 pm – 5:00 pm</b>   | <b>Session 4</b> | <p><b>BST Global Workshop</b></p>   |

**Friday, June 11, 2021**

- |                            |                  |  |
|----------------------------|------------------|--|
| <b>11:00 am – 12:00 pm</b> | <b>Session 5</b> | <p><b>Applied Technology: The Use of Digital Twins through all Phases of an Asset – Design, Construction, and Asset Management</b><br/>                 Everyone keeps talking about digital twins, but many of us are still working in a 2D world. This session will demonstrate some real-world examples of how digital twins are being used in design, construction and asset management to provide full life-cycle management.</p> |
| <b>1:00 pm – 2:00 pm</b>   | <b>Session 6</b> | <p><b>Moving from 2D to 3D Design and Geospatial</b><br/>                 Now that we’ve heard all about the benefits of digital twins, how do you pull that off in your company – particularly if your company still doesn’t have a BIM group?</p>  |
| <b>3:00 pm – 4:00 pm</b>   | <b>Session 7</b> | <p><b>Organizational Network Analysis and Diversity and Inclusion</b><br/>                 Have we solved the diversity and inclusion challenges within the AEC industry? During this session we will discuss current statistics, where we ought to be, what different companies are doing to help drive change, and the tools we might use to measure improvement.</p>  |
